Subject: Acceptation letter

Dear authors **Miguel Ángel García Calderón, René Arnulfo García Hernández**
and **Yulia Ledeneva**:

We are happy to announce you that your paper entitled “**Unsupervised Multi-Language Handwritten Text Line Segmentation**” has been accepted for publication in the “Journal of Intelligent & Fuzzy Systems (JIFS)”, which is indexed in Journal Citation Reports (JCR)-THOMSON REUTERS with Impact Factor 1.261 (2017).

We are expecting the first galley proofs of this issue will go out during the first days of February 2018, and the online publication in March 2018. However, those dates are an estimate and of course may vary a little.

In any case, we congratulate you and your colleagues for the acceptance of your paper in the JIFS journal,

A handwritten signature in black ink, appearing to read "David Pinto", written over a grid of lines.

Profr. David Pinto
